## Public consultation on non-binding guidelines on methodology for reporting non-financial information

Fields marked with \* are mandatory.

### Introduction

The [Directive 2014/95/EU on disclosure of non-financial and diversity information by certain large undertakings and groups](#) entered into force on 6 December 2014, after having been published in the EU Official Journal on 15 November 2014. The [Directive 2014/95/EU](#) amends [Directive 2013/34/EU](#) on the annual financial statements, consolidated statements and related reports of certain types of undertakings.

The [Directive 2014/95/EU](#) aims at improving the transparency of certain large EU companies as regards non-financial information, and focuses on relevant, useful information.

Following Article 1 of the Directive, the new disclosure requirements apply to large public-interest entities with more than 500 employees. The concept of public-interest entities is defined in Article 2 of [Directive 2013/34/EU](#), and includes companies listed in EU markets, as well as some unlisted companies, such as credit institutions, insurance companies, and other companies that are so designated by Member States because of their activities, size or number of employees.

Article 1 of the Directive establishes that companies concerned shall include in the management report a non-financial statement containing information relating to, as a minimum:

- Environmental matters
- Social and employee matters
- Respect for human rights
- Anti-corruption and bribery matters.

Article 1 of the Directive also establishes that the non-financial statement shall include:

1. a brief description of the undertaking's business model;
2. a description of the policies pursued by the undertaking in relation to those matters, including due diligence processes implemented;
3. the outcome of those policies;
4. the principal risks related to those matters linked to the undertaking's operations including, where relevant and proportionate, its business relationships, products or services which are likely to cause adverse impacts in those areas, and how the undertaking manages those risks;
5. non-financial key performance indicators relevant to the particular business.

Companies, investors and society at large will benefit from increased transparency as it leads to stronger long-term performance. This is important for Europe's long-term competitiveness and the creation of jobs. Investors are more and more interested in non-financial information in order to have a comprehensive understanding of a company's position and performance, and to analyse and factor this information in their investment-decision process. The [Directive 2014/95/EU](#) aims at enhancing the consistency and comparability of non-financial information disclosed throughout the Union (recital 6).

The Directive has been designed in a non-prescriptive manner, and leaves significant flexibility for companies to disclose relevant information in the way that they consider most useful. Companies may rely on national frameworks, Union-based frameworks such as the Eco-Management and Audit Scheme (EMAS), or international frameworks such as the United Nations (UN) Global Compact, the Guiding Principles on Business and Human Rights implementing the UN 'Protect, Respect and Remedy' Framework, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the International Organisation for Standardisation's ISO 26000, the International Labour Organisation's Tripartite Declaration of principles concerning multinational enterprises and social policy, the Global Reporting Initiative, or other recognised international frameworks (recital 9). Companies may also consider the sectorial OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, as appropriate.

In order to provide further guidance and help companies implement these provisions the co-legislators have tasked the Commission with the preparation of non-binding guidelines on methodology for reporting non-financial information. Article 2 of the Directive refers to "guidance on reporting", and sets out that "the Commission shall prepare non-binding guidelines on methodology for reporting non-financial information, including non-financial key performance indicators, general and sectoral, with a view to facilitating relevant, useful and comparable disclosure of non-financial information by undertakings. [...]" The objective of the non-binding guidelines is to facilitate the disclosure of non-financial information by undertakings (recital 17).

The purpose of this public consultation is to collect information and views from stakeholders on guidance on reporting of non-financial information by companies across all sectors.

At this time, it is premature to prejudge what form the guidelines should take. This will depend on the outcome of this consultation. The guidelines should be relevant and useful across all economic sectors, and cover appropriately general principles, methodology, and non-financial key performance indicators.

In providing their input to this consultation, stakeholders are invited to consider the companies and groups concerned under Article 1 of the Directive. The new disclosure requirements relating to non-financial information apply to large public-interest entities with more than 500 employees. The concept of public-interest entities is defined in Article 2 of [Directive 2013/34/EU](#), and includes companies listed in EU markets as
